Cont
95. The cushion liner as claimed in Claim 92, further comprising docking means at the distal end thereof.

96. The cushion liner as claimed in Claim 92, wherein said polymeric cushioning material has a thickness varying from 0.150-0.500 inches.

~~97. (New) The cushion liner as claimed in Claim 92, further comprising docking means at the distal end thereof.~~

98. (New) The cushion liner as claimed in Claim 97, wherein said docking means is molded to said fabric on an exterior of said liner.

99. (New) The cushion liner as claimed in Claim 92, completely coated on only the inside thereof with polymeric cushioning material.

100. (New) The cushion liner as claimed in Claim 97, completely coated on only the inside thereof with polymeric cushioning material.

101. (New) The cushion liner as claimed in Claim 98, completely coated on only the inside thereof with polymeric cushioning material.

102. (New) The cushion liner as claimed in Claim 92, wherein said polymeric cushioning material comprises a biocide.

103. (New) The cushion liner as claimed in Claim 92, wherein said polymeric cushioning material comprises a vitamin.

104. (New) The cushion liner as claimed in Claim 92, comprising means for detecting and/or transmitting a signal from the amputation stump to a prosthetic device.

105. (New) The cushion liner as claimed in Claim 92, further comprising a sensor.

SUPPORT FOR THE AMENDMENT

The amendments to the claims are supported throughout the specification and by the Figures as originally filed. The amendment to Claim 75 is found on pages 27-28. Claims 92-105 find support in Claims 75-91; and, for example, the specification, page 15, middle, specification page 25, middle, page 26, lines 5-15, and Figures 5-7 and 9. No new matter has been added.
